

FLAVIA® Creation 600™ REFILL WATER TANK FILTER REPLACEMENT

CHANGING THE WATER FILTER FOR THE REFILL WATER TANK

The filter is replaceable by the user with a new unit. The existing filter adapter should be reused.

To replace a filter:

STEP ONE

Open the top-front panel and remove the sieve by pulling it up.

STEP TWO

Reach inside and pull the filter cap upwards until the filter and the filter adapter are removed.

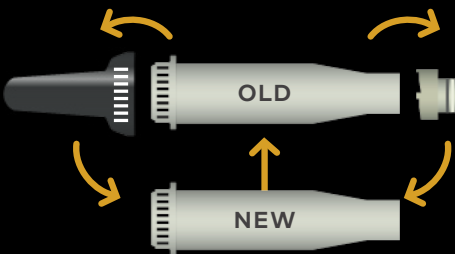

STEP THREE

The filter adapter can now be removed by twisting counter-clockwise.

STEP FOUR

Re-attach the filter adapter to the new filter. Remove the filter cap from the old filter and attach to the new filter.

STEP FIVE

Once all three components are attached, insert the reassembled filter back into the module by aligning the adapter with the hole in the base of the unit and push down until a hard stop is reached.

STEP SIX

The filter assembly should sit vertically inside the unit. The sieve should sit on top of the filter cap when inserted correctly. Finally, please flush before use.
